

Using the Admin Panel, step by step

24 short lessons: the jobs you'll do most in Part 1, and every other screen in Part 2. Each one shows the real screen: the **1** pink numbers on the picture match the steps beside it.

PART 1 · DAILY WORK

1	Sign in	1
2	Read the dashboard	2
3	Find guests and export	3
4	Review a guest	4
5	Send invitations	5
6	Handle invitation requests	6
7	Dignitary parties	7
8	Set up a category	8
9	Message many guests	9
10	Templates and sent messages	10
11	Scan guests at the gate	11
12	Add an admin	11

PART 2 · SETUP AND THE REST OF THE MENU

13	Create a role	12
14	Statuses, titles and countries	12
15	Email settings and mail servers	13
16	SMS and WhatsApp	14
17	Unfinished registrations	15
18	Import guests from Excel	16
19	Partner API keys	16
20	Send a newsletter	17
21	Design a badge	18
22	Areas, gates and scans	19
23	Hotels and guest travel	20
24	Handle e-visas	21

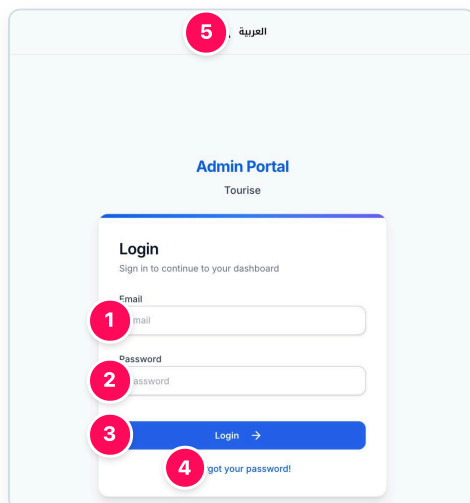

Names, emails and phone numbers in the screenshots are blurred on purpose. Your menu only shows the screens your role allows.

LESSON 1 · LOGIN PAGE

1

Sign in

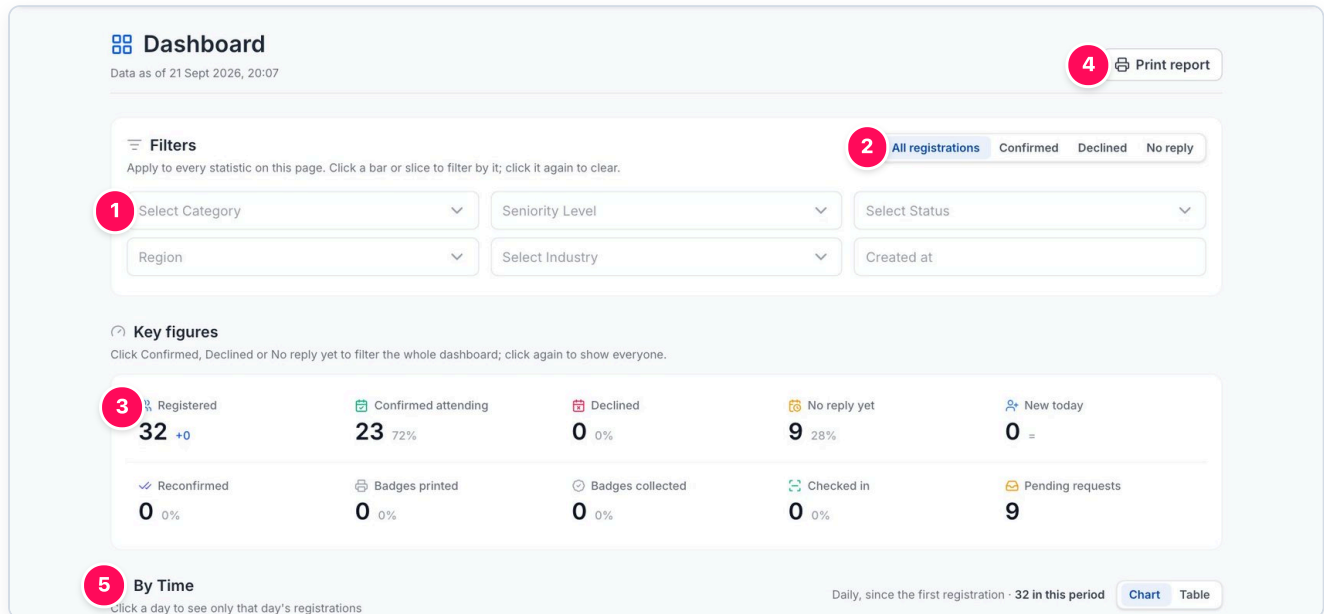

Get into the panel with your email, your password and a one-time code.

- 1** Enter your **email**.
- 2** Enter your **password**.
- 3** Select **Login**. A code is emailed to you. Type it in the **Email verification** box and select **Verify now**. No code? Wait for the countdown, select **Resend**, and check your spam folder.
- 4** Forgot your password? Select this link to get a reset link by email.
- 5** Switch the whole panel to **Arabic** (right-to-left). You can switch back at any time from the top bar.

Read the dashboard

See where registration stands, and print it for a meeting.

1 Filters (category, seniority, status, region, industry, date) change every figure on the page.

3 Key figures: registered, confirmed, new today, badges printed, check-ins, pending requests.

5 By Time: click a day to see only that day. Click any bar or slice to filter the page, and click it again to clear.

2 Switch between **All registrations**, **Confirmed**, **Declined** and **No reply**.

4 Print report prints the page as a landscape report, stamped with the time.

DE Invited by					Asia	Pending	Yes	👁️ 📄 ✓ 🔄 ✕
ATTENDEE					Europe	Pending	Yes	👁️ 📄 ✓ 🔄 ✕
SPEAKER					-	Invited	-	👁️ 📄 🔄 📄
SPONSOR					Asia	Invited	Yes	👁️ 📄 🔄
REQUEST INVITATION					-	Invited	Yes	👁️ 📄 🔄

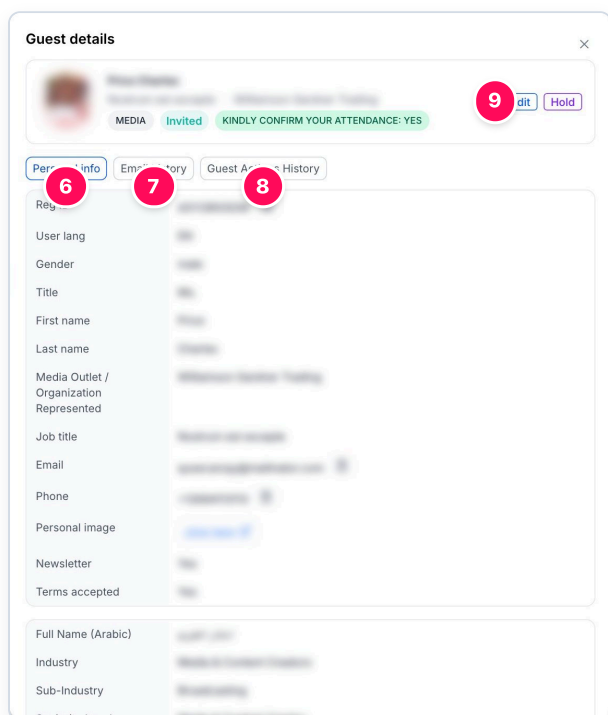

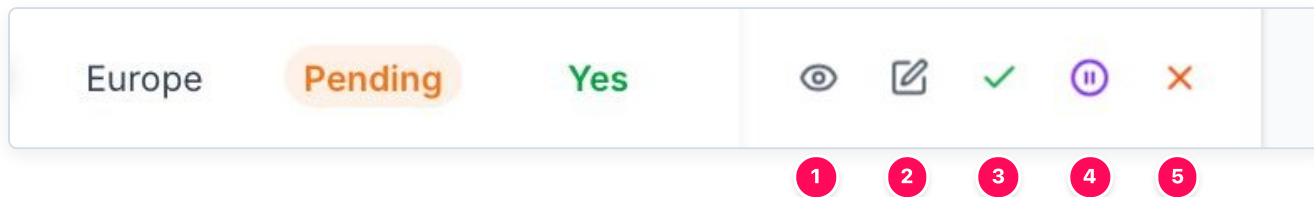

- 1 Fill in what you know: status, category, attending, Reg ID, name, email, phone or date.
- 2 Add filter for more, such as company, nationality, reconfirmation or companions.
- 3 Select **Search**.
- 4 **Reset** clears every filter.
- 5 **Export:** All (Excel), Export Guests or Equipment lists (ZIP).
- 6 **New Guest:** choose the category, fill in its form and save.

FILTER FIRST

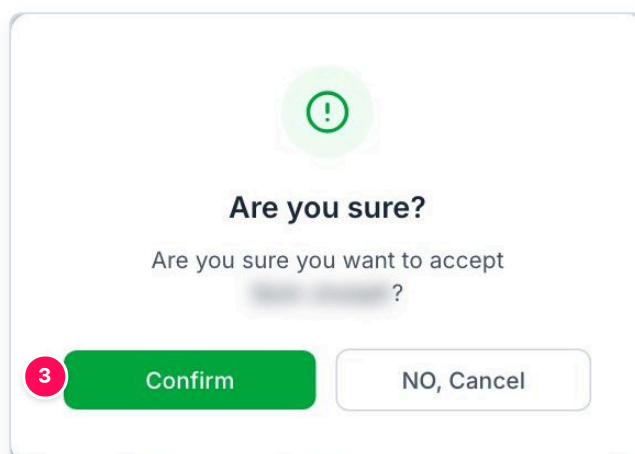

With filters on, Export downloads **only the guests you filtered**. With no filters, it downloads everyone you're allowed to see.

Review a guest

Open a registration, check it, then accept, hold or reject it. The buttons sit at the end of each guest's row.

- 1 **See more** (eye) opens the guest's details.
- 2 **Edit** (pencil) opens their form. Its **Logistics** tab holds flights and hotel.
- 3 **Accept** (✓), then **Confirm**. The guest gets the category's accept email.
- 4 **Hold** (pause) sets the guest On-hold. No message is sent.
- 5 **Reject** (X) sends the category's reject message.

- 6 **Personal info**: every answer on the guest's form.
- 7 **Email history**: every email sent to this guest.
- 8 **Guest Actions History**: who changed what, and when.
- 9 **Edit** and **Hold** are also at the top of the details.

Pending guests show ✓ Hold X. Accepted guests show Resend, SMS, WhatsApp, Print, Collect and e-badge instead. To reopen a rejected guest, use Hold first.

Send invitations

Invite a list of people to a private category (VIP, Speaker, Sponsor and others).

The screenshot shows the 'Basic information' form for creating a new invitation. It includes fields for Usage type, Collection name, Category, Channel, Prefill data, Lock data, With form, and Quantity. Numbered steps 1 through 8 are overlaid on the form to guide the user through the process.

- Usage type:** Select **Single** or **Multiple**.
Single: each invitation link works for one guest and one registration. Multiple: one link can be shared and used by several guests.
- Collection name:** Enter a name for the collection.
- Category:** Select a category from the dropdown menu.
- Channel:** Select a channel from the dropdown menu.
This requires a default SMS configuration. [Configure SMS](#)
This requires a default WhatsApp configuration. [Configure WhatsApp](#)
- Prefill data:** Toggle **Off**.
Pre-fill the registration form with this guest's details from the invitation, so they don't retype them.
- Lock data:** Toggle **Off**.
Prevent the guest from editing the pre-filled fields on the registration form.
- With form:** Toggle **On**.
Generate an invitation link that opens the registration form. When off, no form link is shown for these invitations. Use this for save-the-date cases.
- Quantity:** Enter the quantity of invitations.
- Create:** Click the **Create** button to save the invitation.

- 1 Single:** one link per guest.
Multiple: one shared link for several people.
- 2** Give the batch a **name**.
- 3** Choose the **category** they're invited to.
- 4** Pick the **channel**: email, SMS or WhatsApp.
- 5 Prefill data** puts each guest's details into their form.
- 6 Lock data** stops them from changing those details.
- 7** Enter the **Quantity**. Then choose to type the guests in (*Manual*) or upload an *Excel* list.
- 8** Select **Create**. Open the new collection and select **Send invitation**, or **Send in bulk**.

BEFORE YOU SEND

The email template must include `{{ invitation_link }}`, or guests get no link. Turning **With form** off makes it a save-the-date email with no registration link.

Handle invitation requests

People without an invitation can ask for one on the website or through a partner site. You decide each request here.

☐	REQUEST CATEGORY	Name	Email	Landed in	Status	Created at	Actions
☐					Accepted	15/09/2026	See more 15/09/2026 18:29
☐					Accepted	15/09/2026	See more 15/09/2026 18:29
☐	REQUEST AN INVITATION				Accepted	10/09/2026	See more 12/09/2026 02:05
☐	REQUEST AN INVITATION				Accepted	05/09/2026	See more 08/09/2026 23:01
☐					Pending	03/09/2026	See more Accept Reject
☐					Pending	03/09/2026	See more Accept Reject
☐					Pending	03/09/2026	See more Accept Reject
☐					Pending	03/09/2026	See more Accept Reject
☐					Pending	03/09/2026	See more Accept Reject
☐					Pending	03/09/2026	See more Accept Reject

showing 1 To 10 of 13

1 Search or filter by status, request category, source, date or industry.

3 Tick several pending requests to accept them together.

5 **Accept** invites the person to the target category. *Landed in* shows the invitation they received.

2 **Request Categories:** each request form's fields, target category, emails and OTP.

4 **See more** shows the full request.

6 **Reject** sends the rejection email if one is set. Otherwise the person hears nothing.

PARTNER API KEYS

Partner websites send requests with their own key, under **Operations → API keys**. A key is shown **only once**, so copy it straight away.

Follow a dignitary's party

A dignitary lists their delegation, security and protocol on their own form, and the system invites each person. You only watch and follow up.

Dignitary Parties 1 invitation email

Each dignitary with their delegation, security and protocol. The dignitary adds their people on their own registration form, and each one receives a personal invitation by email, already linked to the dignitary.

2 Search by name, registration no., email

Dignitary	Status	3 Delegation	Security	Protocol
No dignitaries found				

showing 0 To 0 of 0 < 1 >

- 1 Invitation email:** choose the template for all three groups. **Do this first.** Until you do, invitations are created but not emailed.
- 2** Search by name, registration number or email.
- 3** Each dignitary's **Delegation**, **Security** and **Protocol**: who has registered, who hasn't, and whether their email was sent. Use **Send / Resend**, or **Invite someone** they left out.

In the Guests list, a party member's row shows *Invited by* and the dignitary's name.

Set up a category

Every guest belongs to a category. The category decides their form, who may register, the status they get and the messages they receive.

Categories - Edit - [VIP](#)

Change Category: VIP

1 **General settings** | Form configuration | Communications | Success page configuration | Extra actions | Admin access

Only General settings and Form configuration are required. The rest are optional. You can set them now or later.

Basic information

Name en* VIP

Name ar* كبار الشخصيات

Slug* vip
The slug is used in web URLs

Visibility* **2** Private

Status* **3** Active

Status Configuration

On Register* **4** Invited

On accept Accepted

On reject Rejected

5 **Save**

1 Tabs. Only *General settings* and *Form configuration* are required. *Communications* sets which email, SMS or WhatsApp goes out on register, accept and reject.

2 Visibility. *Private* needs an invitation. *Public* is an open link.

3 Status. Active turns the category on.

4 Status configuration. Sets the status a guest gets when they register, and when you accept or reject them.

5 Select **Save**.

TIP

To start faster, use **Clone** on a similar category in the Categories list. Use the **Admin access** tab to add the new category to scoped admins in one step.

Message many guests at once

Send one template to a whole group, such as every accepted speaker, or change their status together.

showing 1 To 1 of 1

1

3 **Logs → Guest Emails:** search by email, workflow, token or registration number.

4 **Workflow:** which step sent the email, for example on accept.

5 **Sent, Delivered, Open, Error:** check here first when a guest says they got nothing.

A new template only goes out once it's picked in a category's **Communications** tab (Lesson 8).

11

LESSON 11 · OPERATIONS → GATE SCANNING

Scan guests at the gate

Check guests in at an entrance with an iPad camera or a handheld scanner.

- 1 Select your **gate**.
 - 2 Enter the **iPad number**.
 - 3 Select **Save**. Then choose **Camera** or **Device scanner** and scan each badge.
- "Guest not found"? Search by name, or capture the badge photo.

12

LESSON 12 · MANAGEMENT → ADMINS → CREATE

Add an admin

Give a colleague access to exactly what they need, and nothing more.

- 1 **Role** decides what they can do. Use **Manage roles** to create one.
- 2 Enter their **name, email and phone**.
- 3 **Data scope**: the categories and statuses they may see.
- 4 **Send setup email** (recommended) lets them set their own password.
- 5 Keep **Require OTP on login** on.
- 6 Select **Create**. Then ask them to sign in and check their guest list.

EMPTY SCOPE = NO GUESTS

An admin with no categories and no statuses sees **no guests**, whatever the hint on the form says. Super Admins see everyone.

13

LESSON 13 · MANAGEMENT → ROLES → CREATE

Create a role

A role decides what an admin can do. Everyone who holds the role gets exactly the same permissions.

1 Name the role in **English** and **Arabic**.

2 **Select all** or **Deselect all** for every screen at once.

3 Or tick a whole section at once, such as **Dashboard**.

4 Tick single actions: View, Export, Accept, Print and so on. Then save.

14

LESSON 14 · MANAGEMENT → GUEST STATUS, TITLES · OPERATIONS → COUNTRIES

Statutes, titles and countries

The lists your forms and reports use. Set them once, before registration opens.

Name en	Name ar	Color	Status	Created at	Actions
On-hold	قيد الانتظار	#805c6f	Active	17/08/2026 14:53	[Edit] [View] [Switch] [Delete]
Pending	قيد المراجعة	#f97316	Active	17/08/2026 14:53	[Edit] [View] [Switch] [Delete]
Accepted	مقبول	#22c55e	Active	17/08/2026 14:53	[Edit] [View] [Switch] [Delete]
Rejected	مرفوض	#ef4444	Active	17/08/2026 14:53	[Edit] [View] [Switch] [Delete]
Invited	مدعو	#14b8a6	Active	17/08/2026 14:53	[Edit] [View] [Switch] [Delete]
Cancelled	ملغى	#8b2728	Active	17/08/2026 14:53	[Edit] [View] [Switch] [Delete]

1 **New Guest Status** adds a status.

2 **Order** sets where it appears in lists.

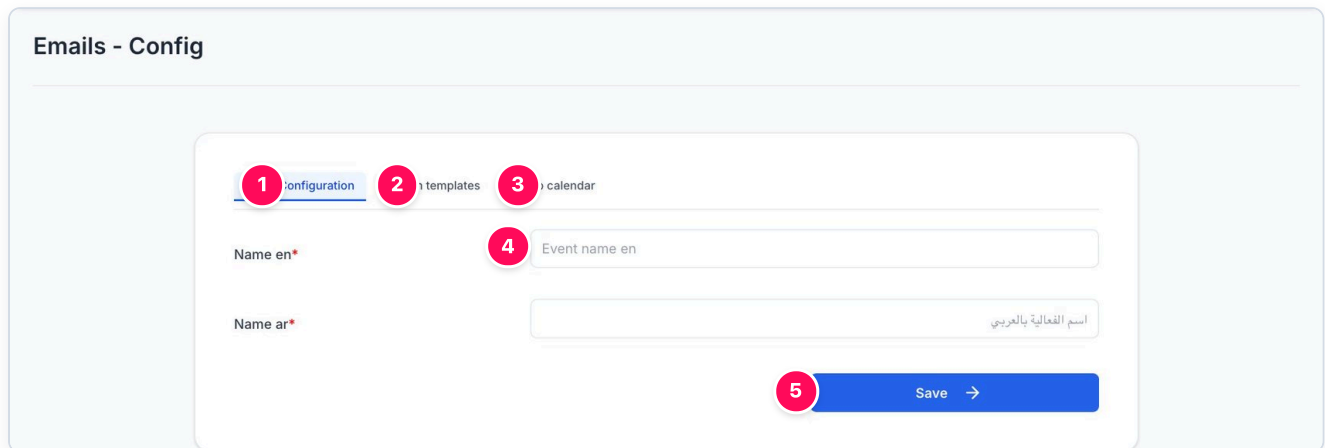

3 **Color** is the badge colour shown across the panel.

4 Edit, view, switch on or off, or delete. Never delete a status that's in use.

Titles (Mr., Dr., H.E. and more) set the gender each applies to, and whether it shows on the badge and the form. **Countries** hold English and Arabic names, the country code and the phone code.

Email settings and mail servers

Set these up once, so every email the system sends has the right event name and goes out through a working mail server.

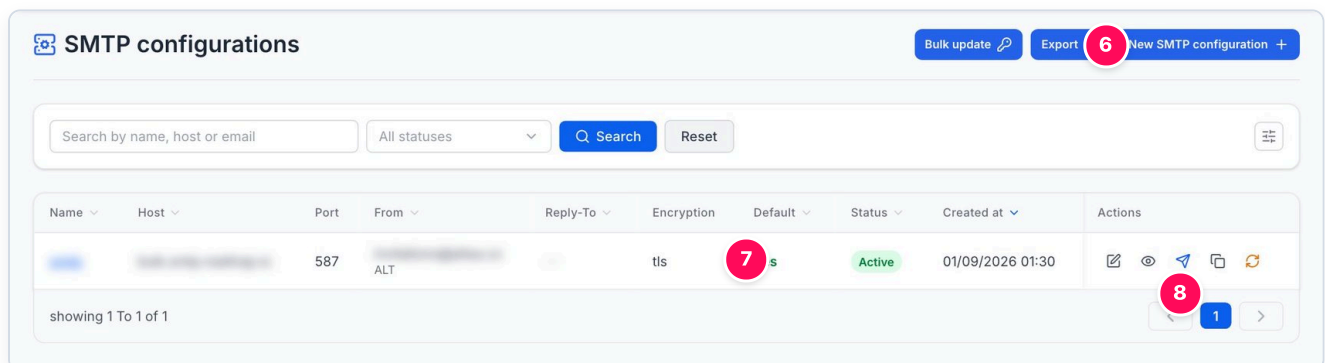

1 Basic Configuration: the event name used in emails.

3 Add to calendar: the event details behind calendar links.

5 Select **Save**.

2 System templates: emails the system sends by itself, such as the login code.

4 Enter the event name in English and Arabic.

6 New SMTP configuration adds a mail server (host, port, sender address).

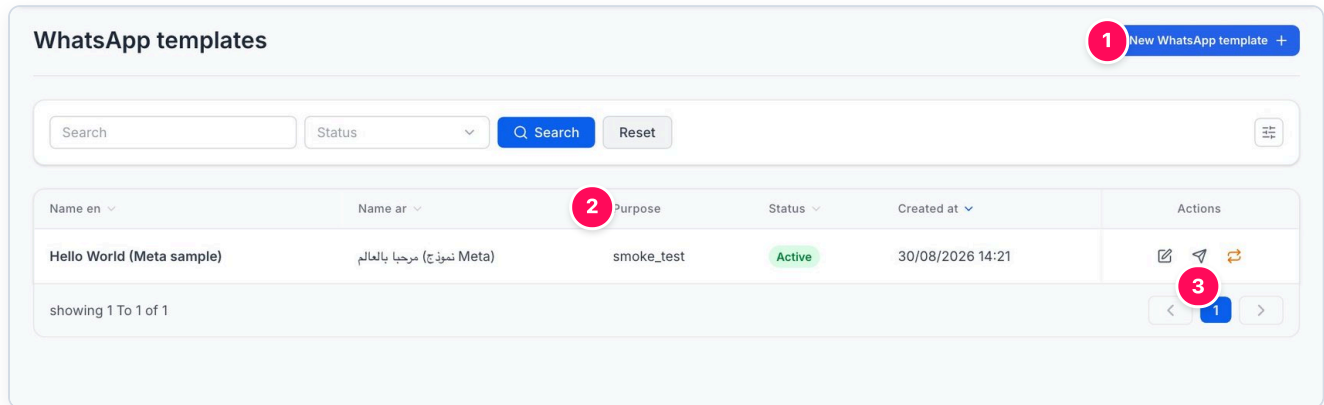

8 The paper-plane icon **sends a test email**. Use it after every change.

7 Default: the server every email uses unless a category picks another.

1 A new admin's setup email needs a default mail server.

SMS and WhatsApp

These work like email: a provider to send through, templates to send, and a log to check.

1 New WhatsApp template, with an English and an Arabic version.

2 Purpose: what the template is for.

3 The paper-plane icon sends a **test WhatsApp**.

CHANNEL	SET UP UNDER	CHECK WHAT WAS SENT
SMS	SMS → Templates · SMS provider configs	Logs → Guest SMS · Invitation SMS
WhatsApp	WhatsApp → templates · config · provider configs	WhatsApp → Guest WhatsApp · Invitation WhatsApp

PROVIDER FIRST

Until a **provider config** is added, the Send SMS and Send WhatsApp buttons stay grey and say “provider not configured”. **WhatsApp config** holds the event details that WhatsApp messages fill in.

Follow up unfinished registrations

People who started a registration form but never submitted it. The list is read-only.

Guest Drafts

Request Invitation									

1 Search by first name, last name, email or phone.

2 **Phone OTP Sent / Verified:** how far they got with the phone check.

3 The eye icon shows everything they filled in.

4 **Export** the list to follow people up.

PERSONAL DATA

Drafts hold the details of people who never finished registering. Only give this screen to the people who follow them up.

18

LESSON 18 · OPERATIONS → IMPORT

Import guests from Excel

Add many guests at once instead of one by one.

Import

API	DESCRIPTION	ACTION
/	Import Guests Excel	1 Upload

- 1 Select **Upload** next to *Import Guests Excel* and choose your file.
- 2 Get the expected column layout from the technical team before your first import.

19

LESSON 19 · OPERATIONS → API KEYS

Give a partner website a key

Partner websites can send invitation requests and newsletter sign-ups straight into the panel. Each site gets its own key.

API keys

Websites allowed to file invitation requests and newsletter signups through the API. Each site gets its own key, so one can be switched off without affecting the others.

1

Website name

Whose key this is. Use the name of the site you are giving it to.

2

Issue a key

WEBSITE NAME	KEY	REQUESTS FILED	LAST USED	STATUS
test.com	3	0	9/10/2026, 2:24:55 PM	4 Revoke

5

Developer guide

Copy guide as text

- 1 Type the **website name**.
- 2 Select **Issue a key**, then copy the key at once. It's shown only this one time.
- 3 After that, only the start of the key is shown, with requests filed and when it was last used.
- 4 **Revoke** switches one site off without touching the others.
- 5 **Copy guide as text** and send it to the partner's developer.

Send a newsletter

Subscribers come from the opt-in on registration forms and from the website. Send them a designed newsletter.

Newsletter

1 **Subscribers** Dashboard Lists Campaigns Newsletter Templates

Select records to send to, or send to the whole list.

2 Email Status Source List Search Reset

3
