

Admin access update: test cases

How to check the new admin and role rules in the TOURISE 2027 admin. 5 October 2026.

How to use this

- **Who:** anyone on the team. No technical knowledge needed.
- **Where:** the test (development) admin, not production.
- **Time:** about 20 minutes.
- **How:** follow each step and compare with the expected result. Write **Pass** or **Fail** in the last column. For a Fail, send the case number and a screenshot.

Use a normal browser window for the Super Admin and a **private (incognito) window** for the other test admins, so you can stay logged in as both.

Before you start (as Super Admin)

1. In **Roles**, create three roles:
 - **Client Manager:** Admins Management (View, Create, Update, Block), Categories (View, Update), Titles (View)
 - **Desk:** Titles (View)
 - **Stronger:** Titles (View, Update)
2. In **Admins**, create three admins:
 - **Client**, role *Client Manager*, Data scope: one category, for example *Media*
 - **Desk User**, role *Desk*, category *Media*
 - **Strong User**, role *Stronger*, category *Media*
3. Log in as **Client** in a private window.

A. As the client manager (Client)

#	Steps	Expected result	Pass / Fail
1	Look at the sidebar	There is no Roles link	
2	Open Admins	Desk User and Strong User are listed. No Super Admin appears	

#	Steps	Expected result	Pass / Fail
3	Click New admin and open the role picker	Desk and Client Manager are offered (and any other role with only permissions Client has). No Super Admin, no Stronger	
4	Create an admin with role <i>Desk</i> and category <i>Media</i>	Saved	
5	Create an admin with a category other than <i>Media</i>	Refused: "This gives access to guests you cannot see yourself."	
6	Open your own record (Client) to edit	Role, Status and Data scope are greyed out , with a note that another admin can change them	
7	On your own record, change your first name and save	Saved	
8	In the Admins list, look at your own row	There is no Block action	
9	Edit Strong User , set a new password, save	Refused: "This admin has permissions you do not have."	
10	Block Strong User	Refused with the same message	
11	Log in as Desk User in another browser, then as Client block Desk User	Desk User is logged out on their next click	
12	Open a category , go to Admin access	Desk User (and the admin from step 4) are offered. Not you, not Strong User, not a Super Admin	
13	Save that category	Strong User and you keep your access to it	
14	Type the Roles page address in the browser (<code>/en/roles</code>)	The page does not open	

B. Roles (as Super Admin, tick Roles View, Create and Update on *Client Manager*; then back as Client)

#	Steps	Expected result	Pass / Fail
15	Look at the sidebar	The Roles link now shows	
16	Click Create role	Only your own permissions are offered: Admins Management, Roles, Categories and Titles (View)	

#	Steps	Expected result	Pass / Fail
17	Look at the <i>Client Manager</i> row in the Roles list	There is no Edit and no Delete (it is your own role)	
18	Open the <i>Stronger</i> role and save it	Refused: "This role has permissions you do not have."	
19	Look for the Super Admin role	It is not in the list	

C. As Super Admin (nothing should change)

#	Steps	Expected result	Pass / Fail
20	Open Admins and Roles	Everything is visible, Super Admin included	
21	Edit any admin or role, block and unblock an admin	Everything works as before	

Reporting

Send the case number, what you saw, and a screenshot to the admin team. If everything passes, reply "All 21 pass".
